Key findings

- **The new 2-step quote form works better.** In the A/B test (Sept 1 – Oct 25), 47% of visitors who started form B finished it, compared with 26% for the old form A. Recommendation: switch everyone to form B.
- **Mobile visitors convert less.** 58% of visits come from phones, but only 2.9% of them request a quote, compared with 5.3% on desktop. The mobile quote experience is the next thing to improve.
- **Traffic jumps when snow season starts.** Daily visits rose about 40% in October compared with September, led by the Snow Removal page. Snow-removal content and ads should be ready before October.
